Process Lead with 6+ years in US banking/loan operations, financial data extraction, and AI-driven workflow automation. Experienced in LLM prompt engineering, IDP systems, and ensuring high-volume data accuracy. Known for integrity, adaptability, and cross-functional collaboration across tech and ops teams.

Experience

OCT 2025 – PRESENT

Process Lead – AI Financial Data Operations | Forage AI | Remote, India

- Lead AI-assisted financial document operations driving structured data extraction, process standardization, and cross-functional delivery across Operations, QA, Engineering, and client teams.
- Led the analysis of complex U.S. credit agreements and covenant packages to define structured extraction logic, business rules, and data taxonomies supporting AI-driven credit risk workflows.
- Translated complex client requirements into standardized operational workflows, enabling consistent execution across Operations, QA, and Engineering teams while significantly reducing knowledge-transfer gaps.
- Designed and maintained SOPs, knowledge repositories, covenant interpretation guides, taxonomy references, and use-case documentation, reducing onboarding time by 50% while improving consistency across delivery teams.
- Served as the primary liaison between client stakeholders and internal Operations, QA, and Engineering teams, leading requirement clarification, delivery planning, issue resolution, and training while maintaining zero delivery delays.
- Partnered with Engineering and QA teams to refine AI extraction logic, resolve edge cases, and improve the accuracy of structured financial data extracted from complex U.S. credit agreements and covenant packages.

DEC 2023 – OCT 2025

Senior Data Specialist | Forage AI | Remote, India

- Partnered with clients during product demonstrations, proof-of-concepts (POCs), and solution discussions, contributing to the successful onboarding of three high-value enterprise clients.
- Led document classification and financial document parsing initiatives for complex datasets, collaborating with clients to refine extraction logic and improve structured data accuracy by 22%.
- Reviewed and analysed hundreds of complex financial documents—including U.S. credit agreements, financial statements, SEC filings, and investment reports—to support AI-driven structured data extraction and quality improvement initiatives
- Designed and developed VBA and Google Apps Script automation solutions to standardize and reconcile datasets exceeding 1 million records, reducing QA effort by 35% and eliminating repetitive manual work for a six-member team.
- Built an integrated Slack–Google Sheets workflow to centralize client feedback, issue tracking, and internal knowledge sharing, reducing resolution time by 70% while improving communication across delivery teams.
- Delivered 50+ onboarding sessions and technical workshops covering financial document interpretation, AI workflows, and operational processes, significantly reducing ramp-up time for new team members.

DEC 2022 – DEC 2023

Data Operations Analyst | Forage AI | Remote, India

- Extracted and structured data from 500+ complex financial documents monthly, including Private Equity Investment Summaries, Financial Statements, Credit Agreements and Form 5500 Schedules
- Annotated and QA-reviewed ML model outputs, improving extraction accuracy from 78% to 92% through targeted feedback loops.
- Built custom GPT + Tabula-based solution to extract tabular data when in-house tools could not process complex tables, preserving 100% continuity in client deliverables.
- Leveraged advanced LLMs to optimize internal workflows as part of Intelligent Document Processing (IDP), reducing processing time significantly.

JUNE 2020 – DEC 2022

US Loan Operations Analyst II | Northern Trust Corporation | Remote, Bangalore

- Managed accurate setup and maintenance of loan accounts for Wealth Management and Corporate & Institutional clients, maintaining 99.7% accuracy across 300+ accounts.
- Resolved 95% of GL exceptions within a 24-hour SLA by collaborating with the Reconciliation Team and clearing pending items through Oracle ERP.
- Resolved payment investigation requests by working with ACH/Wire Investigations teams to trace and redirect funds to the appropriate client accounts.
- Processed 120–150 daily transactions for Demand Deposit Accounts (DDA) and Critical Control Reports, achieving a 98% first-contact resolution rate for client-impacting exceptions.
- Monitored tax delinquency status and escalated potential compliance risks through proactive reporting and follow-up.
- Conducted quality assurance reviews on insurance coverage documentation, identifying discrepancies in 12% of vendor-processed files that could have resulted in underinsurance exposure.
- Processed daily Escrow, Flood, Hazard, and Wind disbursement batches through VMWare Horizon, ensuring timely vendor payments and adherence to servicing deadlines.

Skills

- **Data & Analytics:** Advanced Excel • SQL • Power Query • Data Validation • Data Analysis • Reporting & Dashboarding • Process Automation
- **Financial & Credit Operations**: Loan Operations • Credit Agreement Analysis • Financial Statement Analysis • Covenant Monitoring • Loan Servicing • GL Reconciliation • ACH & Wire Investigations • Escrow Processing
- **AI & Intelligent Document Processing:** LLM Prompt Engineering • Intelligent Document Processing (IDP) • Structured Data Extraction • Financial Document Parsing • AI Output Validation • Annotation & QA • Taxonomy Design.
- **Process Excellence:** SOP Development • Process Documentation • Knowledge Management • Workflow Optimization • Root Cause Analysis • UAT Testing • Cross-functional Collaboration
- **Platforms:** Oracle ERP • IBS • RPM • IrisX • GitHub • Jira • Confluence • SharePoint • Google Workspace • Microsoft Teams • Slack • Notion

Certifications

- "Business Intelligence & Data Analyst" - Corporate Finance Institute®
- "SQL Fundamentals" - Corporate Finance Institute®
- "Corporate Financial Statement Analysis" - LinkedIn Learning
- “Leveraging Gen AI in Finance & Accounting” – LinkedIn Learning

Education

- 2016-2019

  Bachelor of Commerce (Honors with Distinction, Grade A) | Vikram Dev University| Odisha – 64%
- 2014-2016

  Higher Secondary Education (Commerce)| Vikram Dev University| Odisha – 86%

Achievements

- Resolved a time-critical $23M wire transfer for a real estate closing by coordinating across multiple teams to overcome internal process delays, ensuring funds were released before cutoff. Recognized as a Star Performer for ownership, responsiveness, and client-first execution.
- Received the Eminence Award - 2024 for driving process improvements that strengthened operational accuracy, reduced recurring errors, and improved delivery efficiency across the team.
- Contributed to 4 UAT testing cycles, proposing key feature enhancements that proactively detected data anomalies and reduced exception handling.
- Prevented the release of an erroneous $8.5M wire transfer during final authorization by identifying a critical discrepancy, safeguarding against potential financial loss and reinforcing operational control.
